# Express *e* Kit

Extremely easy | Elegant Design | Effective Protection

# The Express E Kit

## is fast and simple to install

It comes ready to install and it takes no more than a few hours to fit. In the box is everything you need for a standard security system, with the option to add extra devices easily if required.

Once installed, give the customer their four button keyfob to operate and that's it!

Kit contents may be different from version shown.

### The key benefits of the Express E Kit:

#### Wireless technology

- No wires - no mess, the system can be quickly and easily installed with minimal disruption.
- The system can be easily upgraded - add up to 28 accessories
- Pioneering wireless technology links the control panel and all accessories.

#### Peace of Mind

- PowerMax+ can send alerts when family members arrive home.
- Portable panic and emergency buttons enable extra security whilst customer is anywhere in the house or garden.
- Home set mode for added security at night.

#### Pet tolerant

- Allows pets to move freely in all areas enabling protection of rooms that could not be covered by standard sensors.
- Even animals up to 38Kg (85lb) can be covered by using a combination of optional accessories.

#### Wireless really works

- This is a professional wireless kit, not to be confused with DIY systems. A quick reference guide is included in the box which gets you up and running in minutes and after your first installation you will understand why we call it the 'Express E Kit'. Adding additional accessories is also very easy, we can also organise training for skilled trades.

#### Be connected

- PowerMax+ optionally connects to the telephone line (no extra equipment needed) to inform customer of alarm activations. Keeping the customer connected with their home at all times. There is even the option of adding a GSM communicator for situations where there is no phone line or SMS text messaging is required.

## How the Express E Kit works in the home

#### Motion Detectors

Pet tolerant movement sensors trigger alerts in the event of a break in.

#### CO Detectors

Alerts to harmful carbon monoxide emissions.

#### External Siren

Visual and audible deterrent outside the property.

#### Door and Window Contact

Ensures doors and windows are closed before arming.

#### Smoke Detector

Alerts to a potential fire.

#### Keyfob

Single click operation enables easy arming of the system or trigger a panic alert.

Shown actual size.

## Frequently Asked Questions

#### Q. How long does it take to install?

A. The Express E kit is pre-enrolled and pre configured with the most commonly used defaults so a basic system can be installed in just a few hours. As the system is wireless there is no need to remove floor boards, carpets or channel cables in to walls.

#### Q. Does the system comply with safety standards?

The system is approved to EN5013-1 Grade 2 which is recognised by the police and insurance companies.

#### Q. Why choose Visonic?

A. Visonic are a global leader in the

commercial and domestic security sector and are recognised as a brand delivering quality products and solutions.
